

Chatsworth Advance®

The Chatsworth Advance® riser recliner is the ultimate bespoke seating solution. It comes with a range of options to suit your requirements and budget.

Choose from a single, dual or dual tilt-in-space action, each providing a smooth, effortless rise and recline movement, operated by an easy to use handset. The Chatsworth Advance® has the ability to adjust its lift and tilt for the best rising position to suit each user. It is supplied as standard in maximum tilt, lowest lift position but may easily be adjusted to achieve higher flatter lift or very high virtually flat lift upon request. This can be helpful with side transfers into bed or another chair.

The Chatsworth Advance® can be tailored to each individual's specification in terms of seat width, height, depth and armrest height to ensure comfort and support when seated and a choice of traditional scrolled or contemporary armrests to match the chair to your own style.

Features
