

The NHS frontline is already facing ‘extreme pressure’ as a result of the busiest summer ever reported. The continued impact of managing Covid-19, the recovery of services and the relative return to usual activity levels has led to a challenging year; especially in the context of constrained capacity due to infection prevention and control, and a smaller workforce. In addition, latest NHS England statistics show only 40% of patients were able to leave hospital when they were ready to in July 2022.¹

These factors, combined with the inevitable increase of frail and vulnerable patients admitted to hospital as a result of trips and falls, and the onset of cold weather and flu, is likely to significantly increase the demand for services.

To enhance winter resilience, DHG has prepared key equipment to help manage the overall rise in patients, assist to reduce bed occupancy, and facilitate easier discharge to enable patients to stay in comfort at home this winter.

DHG’s bariatric and standard rental equipment solutions can enhance winter resilience to support each individual Integrated Care System (ICSs) goals – ensuring a patient led approach and continuity of equipment across healthcare settings.

Over 13,000 people per day are fit to be discharged from hospital²

“Ahead of the winter, we want to make sure we are doing everything we possibly can to free up capacity so that staff can ensure patients get the care they need – this includes timely discharge, working with social care, and better support in the community with the expansion of virtual wards.”

Professor Sir Stephen Powis, NHS national medical director

How DHG can enhance winter resilience:

-  8 strategically located ISO 13485 accredited depots to ensure maximum delivery and service efficiency across the UK
-  A dedicated 24 hour, 7 days a week, 365 days a year helpline with all calls answered personally
-  An extensive rental portfolio that meets the specific needs of the NHS
-  Delivery of fully decontaminated, functioning products installed in a specific location by a Rental & Service Technician who will give you a walkthrough of the features of the products
-  Repair or replacement of any non-working product during the rental period
-  Flexible rental solutions allow you to maximise your budget, only paying for what you use and allowing you to focus your resources on the areas under most pressure
-  A comprehensive block rental solution that can be tailored to the specific needs of the ICS, and your patients
-  Access to the CPD accredited Ethos Education Programme, providing clinical and product training
