

Clinical Application / PU Grading

Technical Specifications

Product Code MAT/PROPLUS/200/85/16

Risk Category Very High Risk

Weight Limit No minimum weight limit is required in

Soft mode. Maximum – 28 stone / 178kg

Warranty 2 Years

Dimensions Standard Size (Length) 200cm x

(Width) 85cm x (Height) 16cm

Product Weight 5.6kg mattress / 3.4kg power unit

Cycle Time 10 minutes
Cycle Control Timer switch

Voltage 220V - 240V / 50HZ (0.2A)

Power 50W

Consumption

Colour Blue

Infection Control / Hypochlorite Solution Compatible

Mattress Cover / Power Unit to be wiped down with Hypochlorite solution and warm water, appropriately diluted.

The **Dyna-Form Air Pro-Plus** mattress is part of the latest developed, dynamic mattress replacement systems available from DHS. This modern technology actually comes equipped with a true fault diagnostic system. The sleek pump design provides ease of use to any carer, whilst removing the "risk" of inappropriately selecting the wrong pressure setting. It's pressure adjustment system, deemed suitable for patients up to and including 28 stone / 178kg and that of **Very High Risk** of pressure ulcer development, ensures that this product is suited to that of any health or homecare environment.

The side formers, which remain constantly inflated throughout operation, provide ultimate stability for the patient and carer at time of transfer. With a reliable cycle time of ten minutes, the utmost consideration towards pressure ulcer management is achieved, therefore minimising patient nausea. Dyna-Form Air Pro-Plus power unit is proven to be one of the quietest systems in its class, for maximum patient tranquillity. The Dartex mattress cover, comprising of the best quality, high frequency welded, multi stretch, and vapour permeable fabric adheres to the strictest infection control policies.

Available with mains cable management system.

Features Benefits

1	Automatic unit	Provides adjustment for patients up to 28 stone / 178kg
	Fault diagnosis system	Ensures rapid response to potential fault detection (telephone or otherwise)
	Sleek modern pump design	Fits sympathetically into most healthcare environments
2	Static side formers	Maintains stability at the point of patient transfer and are useful for patient evacuation
	Transport and Static Modes	Automatically returning to alternating cycle after a short, but adequate period
3	Comfort settings	For use with hypersensitive clients and to achieve maximum patient comfort
	Choice of foam underlay	Provides general, secondary pressure care, giving peace of mind to carer
4	Full length securing straps	Ensures safe use for both patient and carer
	Easy to use power unit	Single button operation avoids complex training whilst also providing ease of cleaning
(5)	LED / Audible warning	Dual indicators alert carers of all functions

- 6 Choice of foam support mattress
- 7 Deflatable side walls for challenging patient transfers
- 8 Large CPR handle design for rapid deflation and ease of use with arthritic hands
- 9 Toggle design cell for easy replacement, decontamination and service procedures
 High frequency welded, multi-stretch, vapour permeable Dartex® cover
- Modern pump design comes with a variety of specialist functions and operations, providing the following modes of application: Static and Dynamic Modes, Soft Mode, Medium Mode, Firm Mode, Fault diagnosis function, Lock out function, Power On / Off
