**Unique sit-to-stand pattern**

High capacity battery with long service life

Compact format

Built-in charging

Soft, adjustable lower leg support

Lockable rear castors

Footplate with low step-in height and anti-slip surface

Electrical base widening

## A unique solution for active sit-to-stand – with electrical base widening

MiniLift125 is a mobile sit-to-stand lift which is used, in combination with a specially adapted lifting vest, to assist users with reduced function when rising from a sitting to a standing position. MiniLift125 features a construction offering a totally unique and extremely comfortable sit-to-stand experience. The lift is also compact and convenient and very easy to manoeuvre; features which, in combination with the possibility to adjust the settings for an optimal fit for every user, makes it very useful in most locations and situations.

# MiniLift125

**Extremely comfortable, active sit-to-stand with natural movement pattern**

MiniLift125 has been developed to, as gently and comfortably as possible, assist the user when rising from a sitting to a standing position. The handles and the side supports offer multiple hand placement options for the user. The stable anti-slip foot plate is very low and the lower leg supports, as well as the lifting arm, can be adjusted to fit every user optimally. When MiniLift125 is used in combination with the appropriate lifting accessories, the user is supported under the feet, for the front of the lower legs and behind the back, which provides for a safe and secure, yet active sit-to-stand procedure. The construction safely moves the user forwards and upwards in a natural movement pattern and, at the same time, the leg muscles and balance are exercised. MiniLift125 is manufactured in steel for stability and strength and is suitable for users weighing up to 125 kg/275 lbs.

Active sit-to-stand with natural movement pattern.

## PRODUCT SPECIFICATION

MiniLift125 \_\_ Mobile sit-to-stand lift with electrical base widening \_\_ Art. No. 400641434

## TECHNICAL INFORMATION

Safe working load (SWL)	125 kg / 275 lbs
User length, min-max	1400-2000 mm / 55.1-78.7"
Material	Powder-coated steel
Height	995 mm / 39.2"
Length	900 mm / 35.4"
Width of base, outer measurement	600-890 mm / 23.6-35.0"
Width of base, inner measurement	445-745 mm / 17.5-29.3"
Weight	39 kg / 86.0 lbs
Base widening	Electrical
Height of footplate, for user	50 mm / 2.0"
Castor size, diameter	80 mm / 3.1"
Lifting speed, without load	35 mm / 1.4" per sec
Emergency lowering	Manual and electrical

MiniLift125 meets the requirements of the Medical Devices Directive for Class 1 products 93/42/EEC.

Ergonomic and easy-to-use hand control with 4 buttons.

New control box with diagnostics, e.g. lift counter and overload indicator.

Emergency stop button readily available on the control box.

## ACCESSORIES

Art. No.	Product name	Description

**ThoraxSling**  
SystemRoMedic™

ThoraxSling is a specially adapted and very comfortable sit-to-stand vest that is used in combination with Handicare's SystemRoMedic™ MiniLift sit-to-stand lifts. It is easy for the caregiver to apply, while giving the user an added sense of security during rising and standing training. ThoraxSling also facilitates toileting. ThoraxSling is available in two models; one which provides support behind the back (ThoraxSling) and one that also gives support under the seat (ThoraxSling, with seat support), and in several materials and sizes.

### Other models and variants of MiniLift mobile sit-to-stand lifts

MiniLift is available in several models and variants with different lifting capacity, with electrical or manual base-width adjustment and with standard height or low legs for use with lower beds.
